Subject: Microsoft Settlement

I am writing because I feel the my voice should be heard in some important matters. I know very little about business and I know very little about microsoft specifically. I do have experience in dealing with microsoft products and other products as well. I read through the proposed settlement in the Microsoft Antitrust Trail. I don't have any specific points to argue as far as the settlement goes. I think it gives Microsoft no punishment for doing anything Illegal and it does nothing to prevent them form doing anything illegal in the future. It will not remedy an of the issues the Microsoft has been found guilty of. This can't be allowed to happen. The laws as far as Antitrust issues were made for a reason and microsoft has broken them in the past and is doing it still. The government of the United States of America should do something to stop this and they aren't. they are accepting what microsoft has proposed no matter who actually proposed it. Why would any company propose something in the bad interest? I feel very strongly that this is an unfair proposal and I object.
